Comparison with other CAD software DraftSight has similar features to AutoCAD, and with its DXF support, Open Office Calc. AutoCAD LT does not have DXF support; thus, it cannot import DXF files from other programs. Real Architectural Desktop (RAD) from Mitsubishi is a 3D software suite available for both Windows and Mac OS. RAD's concept is to bring together all design and drafting software into one package. The design and drafting tools of RAD are similar to those of AutoCAD. Open source DraftSight is free and open-source software. The department's main website at www.georgiajobs.com contains a searchable job posting database, links to job sites and other tools to help job seekers. Online skills testing and certification exams can be found on the Georgia Department of Labor's Career Online Services website. There are many different certifications available on the website. Some certifications are temporary certificates that can be used by anyone, while others are specific to a career path. For example, the self-service testing system is geared toward the personal service industry, while the first aid (general) and CPR/AED certification systems are for job seekers looking for a career change. Some programs require that you pass a skill test or certification exam prior to attending a training course. These exams are listed on the website. If you pass an exam before you enroll in a training course, you may be able to list your certification on your resume and/or use it as a career reference. The department provides information on the types of jobs available in Georgia, how to find those jobs, industry trends, work environments, and health and safety issues. 1. Select File → Properties. On the Properties dialog box, enter a name and location for your project. Click OK. Close the Properties dialog box. Click the New Project icon and select Autodesk AutoCAD 2014. Name the project. Select Open from the Folder drop-down list and select one of the following: > Autodesk® AutoCAD® > AutoCAD LT > Autodesk® AutoCAD 2014 > Autodesk® AutoCAD LT 2014 + Click OK to open the AutoCAD project. Autodesk® AutoCAD® appears on the main program menu. The startup report displays a list of errors. To correct the errors, perform the following steps: Choose File → Work With. On the Open dialog box, select your project and click OK. To correct other errors, repeat these steps. When the startup report displays no more errors, click OK. If the startup report indicates there are new items to add, select Add to open the Add Files dialog box. On the Add Files dialog box, choose the items to add and click OK. To open the Options dialog box, select Options from the File menu. On the Options dialog box, modify the settings as needed, and then close the Options dialog box. Your first project If this is the first time you have opened the project, select View → 3D. An engineering window opens. The Engineering toolbar appears. The Home tab appears. The Project panel displays the name of the project. Add a reference line to the view The reference line (green line) is a line that appears on the work plane that is used to establish the absolute reference points of the project. To add the reference line to the view, do one of the following: + Choose View → Project Settings. + Choose View → Project Properties. + Choose View → Toolbars and Navigation Controls. + Choose View → Standard toolbar. + Click the Reference Line button. + Click and drag to create the line. When you have the reference line displayed on the work plane, click the Reference Line button again to hide it. To add another reference line, repeat these steps. When you have added all the reference lines, move the view to the Left view. Organize the view window The
