AutoCAD Product Key is bundled with a number of hardware and software add-ons, including Autodesk Inventor, a software application for 3D design. Although AutoCAD Product Key 2019 is the latest release, AutoCAD 2017 and earlier are supported. It is a large program with a footprint over 3.5 GB, depending on the platform (Windows or macOS), version and number of installed add-ons. It requires 2.6 GB of RAM to run. Windows and macOS users can install AutoCAD 2017 as a standalone program, whereas macOS users can install it as a macOS package (which is a self-extracting zip file). AutoCAD can also be installed on Windows using Microsoft's Windows

Subsystem for Linux. Contents Documentation First-time users of the AutoCAD product might find the documentation located in the Autodesk Product Support Center, a web portal accessible from any Internet-connected device. An Autodesk Learning Site also provides tutorials, a blog, videos, and learning resources, including live chats with Autodesk experts. Installation The following prerequisites must be met before installing AutoCAD: Mac OS X 10.9 or later. Intel processor with integrated Intel Graphics 3000 or better. A compatible graphics card with at least 1 GB of RAM. Windows 7, 8 or 10. 8 GB of free space on your hard drive. 16 GB of

ObjectARX API with the Eclipse Visual Studio Tools for Microsoft Windows plug-in. An ObjectARX extension for AutoCAD can be installed as a tool and be activated via the Application menu, or a separate desktop icon. When the tool is activated, the extension is available for use by the user as a button on the command line, the right-click menu, and the extension menu. An ObjectARX extension for AutoCAD can be designed to be used with a graphical user interface, or as a command-line application. Extension applications can use user-interface options, such as buttons, radio buttons, and pop-up menus, to display information to the user. A command-line version can run without a GUI. Microsoft Visual Studio is required to create extensions using the ObjectARX API. Other APIs AutoCAD also supports the following APIs: Visual LISP Visual LISP is a programming language and associated API for use in AutoCAD. Visual LISP programming can be used to automate processes in AutoCAD. Visual LISP can be used from within a Visual LISP development environment called XREF. Visual LISP also has a Command Line Interface (CLI) version called XLISP. VBA AutoCAD supports Visual Basic for Applications, or VBA, a programming language that is natively supported by AutoCAD and its products. VBA can be used to automate AutoCAD. ## What's New in the?

NOTE: Starting with AutoCAD 2023, you can import drawings directly from paper or PDFs, without the need to create a new drawing. The import dialog box allows you to select the paper or PDF to import. The same paper or PDF can be imported multiple times. NOTE: Markup Assist is now enabled by default. Batch Create: Create drawings in bulk, easily. NOTE: Batch create is only available when new drawings are created. This allows you to create drawings more quickly than with Batch Save. NOTE: Batch create has the following limitations: - You cannot batch create additional drawings from a shared template file that is open in a non-batching mode. - You cannot batch create drawings that are locked, flagged, or linked. - You cannot use unique naming conventions for the drawings that you create. - You cannot batch create drawings that are set to the first set of drawing views. - When importing.DWG files or.DGN or.DWG template files, you cannot set the Default Location. - When drawing a model or construction project, you cannot set the number of models. - There is no support for time and cost fields. - When importing.SGN files, you cannot set the Default Location. New Feature: Markup Assist: Enter text and annotations directly onto your drawings. You can use individual letters, numbers, and symbols (i.e., no bold or italic). NOTE: Annotations remain on screen until you change the drawing. If you'd like to review an annotation, simply click on the annotation in the ribbon. NOTE: For the current version of AutoCAD, the version number is 2023. You can check for updates from the Help menu. NOTE: The next version of AutoCAD will feature Markup Assist and will be named AutoCAD 2030. New Feature: Feature Control Change the appearance of a feature to express an appropriate behavior or level of detail. NOTE: Feature control enables you to use the ribbon for non-polygon editing. New Feature: Autoline Add lines or arcs to models and drawings automatically. NOTE: Autoline applies a continuous line or an arc to a selection, according to the selection's dimensions. New Feature: Enclosed Regions Split
