Its three modules include a 2D Drafting program, a 3D Drafting program and 2D and 3D Civil Design tools. In May, 2009, it had over 30 million licensed users. AutoCAD Architecture (formerly AutoCAD Revit) AutoCAD Architecture is a 3D modeling and parametric modeling program designed for use in architectural, engineering, and construction design. It uses a parametric modeling technique called Constrained Parametric Design (CPD). An architectural model can be created in a project, with plans, sections, elevations, and shading and textures for visualizing the project. The product has been available since 2001, and was initially called "AutoCAD Architecture". When Autodesk acquired Intergraph Corporation in 2002, Intergraph's Architectural software was rebranded as AutoCAD Architecture. Autodesk discontinued the Autocad Revit brand in 2013 and replaced it with AutoCAD Architecture. Autocad Modeling Suite (formerly AutoCAD MEP) Autocad MEP is a parametric modeling and drafting program designed for the Erector Set and CNC programming. It also supports 3D modeling through CAD packages. These programs can be used in conjunction with the partner products listed below.
