What's New In Collection Studio?

Collection Studio is an all-in-one solution to organize, manage and view your collection of stamps, coins, posters, discs, medals, banknotes or any other item, providing editable fields for all kinds of details, such as the year, the country of origin, currency, material, quality, price, storage place, donator and more. You can also add your own custom fields. All entries can be assigned an unlimited number of images, along with file attachments (for instance, authenticity certificates). Your photos as a collection Photos are collected in albums and stored in an album tree, so you can easily navigate through them. Just double click the folder icon and you'll see all the entries of the current folder on the left sidebar, or just click the photos and they will appear on the right sidebar. All the photos are supported by basic features, like rotating, zooming, resizing and cropping, as well as by advanced features like overlays, reflections, shadows, etc. If you are short on space, the application allows you to compress pictures to save space, with an option to change the compression method. The application comes with a great photo browser: you can easily view all your images and move them to other albums, while the image tab shows all the details about each image. All the images can be edited by simple drag & drop, simply rotating, resizing, saving, moving, zooming and cropping, while advanced features can be enabled, like modifying the shadows and much more. Collection Studio provides a basic image viewer to view and edit your images. You can view all the details about each image, including its size, color depth, bit depth, resolutions, orientation, frame and borders, while it can be resized, rotated, saved, moved, cropped, zooming and even edited by simple drag & drop. All the images can be viewed by simply double clicking on the image. The application also includes a basic photo browser: you can view all your images and move them to other albums, while the image tab shows all the details about each image.
