Download Easy VJ Software Ever VJPlayer Full Crack (Unlocked) free link for your PC and laptop! VJPlayer is a powerful tool that you can use to make video effects, transitions, layers, and background music. Your PC & Devices Free.Q: How to obtain duplicate rows with SQL in Postgres? I would like to delete multiple duplicate rows in one query but I can't succeed. I tried to use row numbers or dense\_rank or any other way I found in internet, but I didn't succeed. For example, I have a table that looks like this. id | tag | [film1, visual effects1] 2 | [film1] 3 | [film2, visual effects1, visual effects2] 4 | [visual effects1] 5 | [film1] 6 | [film2, visual effects1, visual effects2] 7 | [visual effects1] So, I would like to select all the rows of id 1-5, 6-5, and 7-5 (for example). I tried this, but it doesn't return me all the rows I want. SELECT id FROM myTable GROUP BY id HAVING COUNT(\*) > 1 A: You can use window functions - here is an example: SELECT id FROM ( SELECT id, COUNT(\*) over () as cnt FROM myTable GROUP BY id HAVING cnt > 1 ) as t WHERE cnt = 2 3da54e8ca3
