Keep your Gmail data secure and safe. Backup the data as an archive file and restore it whenever needed. 09-07-2010, 12:40 AM istarch It's so simple to use and has a clear and concise interface. I have not found anything that even comes close. 09-07-2010, 12:44 AM flo Well, the interface is pretty good. It is still fairly new and i believe there still are bugs to be worked out, but I was able to backup everything without a problem. There are also many different ways to restore your files such as selecting text/perform search functions/picture/contacts/folders, etc. The one thing that could be improved is the ability to batch backup, like you can create "tasks" in Windows. I was able to perform certain functions (like restore in bulk) in one "task" and then finish the task. This could be better, but it's a minor thing. Overall, I am very pleased with the program. Edit: Also, to anyone reading this, I was able to restore files without having to restart the program each time. (that is a big plus in my book.) I have been using the backup program for some time now and it is a good one. The interface is okay, maybe a little more simple, but still does the job. There is not way I would use another program. However, the restore feature is not as good as one like 7Zip. You can not choose what folders you want to restore, but it does not add items to the recycle bin, just copies the items. 09-07-2010, 01:01 AM badaboo I have never used a program that can back up my emails/contacts. I have used Xobni to try to backup emails and think it's crap. Other than that, this is my first backup program and I like it. 09-07-2010, 01:05 AM Happy Camper I have never used a program that can back up my emails/contacts. I have used Xobni to try to backup emails and think it's crap. Other than that, this is my first backup program and I like it. Which backup program do you use? 09-07-2010, 01:06 AM flipzy I have used the backup program since it
