Planning for a 70th Birthday Party When it comes to throwing a party, sometimes it seems like we're trying to design and plan an elaborate underwater restaurant—for a bunch of grown adults. Between planning the menu, filling the guest list, figuring out where the guest of honor would like to be seated, and finding a date that both of you would be free on, it's enough to make you wish that you were still a kid and that there were pop-up restaurants with whimsical names at which one could dine al fresco. We all have our own style for throwing a party, and for most, the reason behind the party is to celebrate an

occasion or to commemorate a milestone. What makes a party special is how you choose to highlight your special occasion with the help of your guests. Of course, when you

Graphical Tools Plug-in is a plug-in package that allows you to integrate the Perforce version control features in Photoshop, Maya, 3ds Max and Softimage. You can use this tool for accessing the files from the Perforce server and work with multiple versions. The plug-in can display the asset status and provide you with details about the current version as well as the revisions. Guidelines: Plug-in helps you to keep track of the objects under Perforce control and move them between projects or to the repository. You can add and manage the file objects in the asset table and use navigation and search tools to find any file. You can easily search for, view, add and delete items in the asset table. For more details see the Help documentation. The plug-in is integrated with Photoshop CS4, Maya 2008 and 3ds Max 2009. Requirements: Plug-in works on Photoshop CS4, Maya 2008 and 3ds Max 2009. Installation Instructions: Drag and drop the .zip file in Photoshop, Maya, 3ds Max and Softimage. Then follow the on-screen instructions. #This is the main configuration file for the xlwings-open source user GUI library. #If you'd like to overwrite any settings, simply add them to the sections below #Note: These settings need to be configured in the Registry editor # [HKEY_CURRENT_USER\Software\PutTY\ColorCustomizations] # The main settings section [Settings] CurrentColour = #FFFFFF Color = #FFFFFF CursorColour = #000000 Font = Consolas,12 ForegroundColour = #FFFFFF BackgroundColour = #000000 HilightColour = #000000 HilightForegroundColour = #000000 HilightBackgroundColour = #000000 [Scrolling] ScrollingStyle = ScrollUp ScrollingSpeed = 15 ScrollBuffer = 40 [Listboxes] Colours = #FFFFFF ForegroundColour = #FFFFFF BackgroundColour = #000000 [Tabs] Tab1Colours = #FFFFFF Tab2Colours = #FFFFFF Tab3Colours = #FFFFFF Tab4Colours = #FFFFFF Tab5Colours = #FFFFFF Tab6Colours = #FFFFFF Tab7Colours = #FFFFFF Tab8Colours = #FFFFFF Tab9Colours = #FFFFFF Tab10Colours = #FFFFFF Tab11Colours = #FFFFFF Tab12Colours = #FFFFFF Tab13Colours = #FFFFFF Tab14Colours = #FFFFFF Tab15Colours = #FFFFFF Tab16Colours = #FFFF

System Requirements:

OS: Windows XP Processor: 2GHz Intel Core Duo CPU, or equivalent Memory: 1 GB RAM Graphics: NVIDIA GeForce GTS250 1 GB, or equivalent Hard disk space: 1 GB space for the installation file, 1 GB for the updates Viewing Mode: 1024x768 resolution, 32-bit True Color Can be run with the following video settings: Hardware Acceleration: true Additional Hardware Acceleration: no Audio: system default (only for Audio Test Version 2).
