ITunes Album Browser Widget Crack+ For PC

The iTunes Album Browser Widget is a powerful iTunes album browser and remote. Control playback and rate your music while you visually browse, sort and search the albums in your iTunes Music Library by viewing the album artwork. Here are some key features of "iTunes Album Browser Widget":
❑ iTunes controls and display that show information about the playing track/stream
❑ Announces the current playing track and album (popup window)
❑ Add any album to your desktop for easy access (separate window)
❑ Show artwork and rating in the Widget Dock
❑ Resizable to bar or icon size
❑ Sort your album collection up to 7 different ways
❑ Search for, add, delete and view (in full size) album artwork for your albums
❑ Search for albums by artist or album name
❑ Play or queue full albums
❑ Related links to iTunes Store, Pandora, Last.fm Using the iTunes

Album Browser Widget: You can use the iTunes Album Browser widget with both iTunes (or later versions of iTunes) and Windows Media Player 10. In iTunes, the widget displays up to 7 different ways to organize and view your albums. You can sort them in the following ways:
❑ Artist - Alphabetically
❑ Album Title - Alphabetically
❑ Number of Albums - You can sort all your tracks (if you have any) or just your album songs
❑ Disc Number - Alphabetically
❑ Year - By Album Title
❑ Genre - By Genre
❑ Critic Rating - Based on the number of stars
❑ Release Date - Most popular, alphabetically
The Apple iTunes Album Browser Widget will announce the current playing track (album) like this:
❑ iTunes, Windows Media Player 10 and Windows 7 compatible
❑ Click to see more info and change album
❑ Double click to pause playing
❑ Double click to play
❑ Click on - iTunes play all from this album
❑ Right click and drag to set a new order
For advanced users: The widget also contains a number of features for more advanced users:
❑ Search - search for albums by artist name or album title
❑ Add - add an album to your desktop
❑ Pause - pause or play a full album
