I've been trying to find an answer to this problem, but I haven't had much luck so far. I am trying to convert an Angular 1.x app to Angular 2 (without the introduction of Typescript). I have used Angular's createComponent() method to import and inject the new component into the Angular 1.x app, and Angular 1.x seems to be able to resolve

the components' providers. But the Angular 2 app itself doesn't seem to be resolving anything, either the providers or the service. The Angular 2 code itself works fine, but nothing is injected into it. The Angular 2 code is as follows: import {ComponentFactory, ViewChild, ViewContainerRef} from 'angular2/core'; @Component
