AutoCAD Crack +

How to begin? First, you need to get used to the drawing process. How do you draw something? Do you use the keyboard, the mouse or some other drawing aid? There are many ways to get started. Use the Graphing menu from the Home tab, or use the graphical buttons on the status bar. Choose a drawing from the list, or create your own drawing by dragging and dropping icons from the drawing list. Or, you can draw in the drawing area with a mouse or other drawing aid. First, you need to draw a simple line, a box, a circle, a polygon or any other element you need. You can draw by following a path, or you can simply place a point, line or polygon on the screen. For more detail on the drawing process, refer to the table below.

What do you need to draw?

Path drawing In this type of drawing you need to define a path or a line, which you may want to modify. Use the Line, Polyline and Arc tools to draw, modify or delete the lines.

Point drawing Use the Line and Arc tools to draw a point and a polyline. You can also modify the point by clicking it. To modify the point click, and move the cursor to the right. A red circle will appear. Click the circle to modify the point. Click again and you will see the point disappear and the point definition box will appear. You can use the Copy and Paste tools to create multiple copies of a point. You can also delete points by clicking the point and then the cross symbol in the top left-hand corner. Clicking the point again will also delete it.

Line drawing Use the Line tool to draw a line, and modify it by clicking and dragging it. You can also use the Line to draw a polyline. Clicking the line and moving the cursor to the right will change the line width.

Rectangle drawing Use the Rectangle tool to draw a rectangle. You can also use it to draw a polyline, or a polygon. You can also use the Polyline to draw a polyline. The line is active when you are drawing. To activate it, click anywhere in the drawing area, or click the line and move the cursor to the right.

Circle drawing Use the Circle tool to draw a circle.
