It is full offline installer standalone setup of BTD6.[Rectal cancer surgery: an innovative 3D-MR technique: an alternative to the gold standard 3D-T1-weighted fast spin-echo]. There is no perfect gold standard for the management of locally advanced rectal cancer. Standard MRI techniques have proven to be unreliable regarding tumour staging and local tumour delineation. With the use of the dedicated 3D-motorized table, we proposed to use a new technique based on 3D fast spin echo and gadolinium injection. This technique is based on signal intensity maps where the differentiation between tumour and normal tissue is particularly striking. The purpose of
