The West is growing day by day, and you're looking to stake your claim. To win, you have to gamble your relationships with the most powerful bosses in town to win influence. This influence comes in many forms: Law, Money and Force. If you're clever enough, you'll be able to take claim over the buildings in the ever growing boomtowns and gain powerful abilities. At the end of the day, the boss who has the best combination of wit and bluff will become the most powerful tycoon in the Wild Wild West.

GAMEPLAY The game is played in a series of rounds. Each round, poker cards are dealt between the locations, which are laid out in a circle. Players place posse members on these location cards, which will both give an action and count as a bid for the location's valuable resources. Players also get a poker card of their own which uses the two adjacent cards from a location to form a three-card hand. This creates a clever mix of modern worker placement and poker that drives the game. In addition, players must manage their resources of Law, Money and Force to buy buildings and gunfight. If you have the highest stake in the most lucrative industry at the end, you will be rewarded bonus points. Add these points to the points you've collected from buying buildings and determine the winner!

Important Notes

What is this game?:

On this game, you are defending a city against a wave of aliens from the sky.

There are 15 levels to beat. Each time you successfully beat a level, you will earn the dragon head emblem on your country. At the end of each level, you will be listed with all your countrymen or woman as the top countries. After winning all 15 levels you can see the world rankings list. You will compete against hundreds of world's best fighter jet pilot/forces and your countrylist shall be list as the top countries.

The highest scoring countries will receive their soldier dog toys that will come flying directly to the dog at the bottom right corner of your play screen.

It is worth mentioning that your highest score at any time always remains fixed just like the perfect score of any PC game. You will become the best fighter jet pilot or force in the world in this game. My country's position is top of that world rankings ;)

It is important to know that all countries will play against each other for no more than 15 times for any nation. Once an opponent nation finishes their 15 rounds then they become your rival. On other hand while defeating a country on any round, they instantly become the enemy of you own, and vice versa. Thus at any rate, in the end, if you are really good at this game on the final world rankings, you can simply defeat your own opponent.

Anytime 15 moves of finishing any fight of the stage, you can capture that country, and basically turn it to the flags nation. For example if you already successfully captured France's World, you will be able to complete your 15th round to capture France by capturing the France's last country.
