## PWK: All New For 2020 | Offensive Security | OSCP

A: So, after a lot of searching, I discovered the answer. To do this, I compiled a modified version of the train script that contains a sed command. The reason this worked was because the version of Kali that I used had a sed version prior to 5.12, which is where the --backup and --check-sed-versions flags are located. That's why one of the first things I did was to grep --color --file \$(which sed) for the --backup flag, which was there. This was key since, when I compiled the code, I didn't include any of the sed commands. Now, you don't necessarily have to do this if you're using a newer version of Kali, but since I didn't, I had to make the modifications myself. Though my solution works, the official solution actually "spills the beans" and gives you the answer yourself. Here it is: `#!/usr/bin/env bash #Uncomment this to see the error message: #echo $1 #Kali version: version=`cat /usr/share/app-install/desktop/kali-linux-vmlinux` #script location SCRIPT_DIR="${0%/*}" #Get current directory location cd "$SCRIPT_DIR" #Make sure Kali is installed if! apt list --installed kali-linux*; then echo "Kali Linux not installed!" exit fi echo $version #Create a link to the trinity tool called pwkitool ln -s $(which trinidad-distribute) $SCRIPT_DIR/pwkitool #Make sure pwkitool is in this directory if [! -d "./pwkitool" ]; then echo "pwkitool not in this directory" exit fi #Get the directory of the script script_dir=`pwd` #Get the directories that contain the packages related to pwkitool cd $(find./pwkitool/ -type d -name "*.deb" | sed "s/\pwkitool\///g") #Get the package to try to install TARGET=`grep kali $script_0cc13bf012`

Learn how to use Kali Linux to effectively test the security of your computer inÂ . Out of the box you will be learning how to use Kali Linux and how to install additional tools to help you test the. Finally i am able to reach all lab machines and i am able to download all the materials and all notes for getting my full. My lab number was 39 (out of 41).
