Ask HN: Which tech skills can make you more employable in the next 3 years? - bholtz It would be great if you could articulate why each skills is either/or. ===== anuraj Depending on your age you should master at least Matlab, Octave, Python, Rudiments of Labview/Simulink. Though Labview is a cross platform solution, I use it for simulation on windows. A good understanding of Labview with Labview IDE and Version Control would be very valuable. If you wish to learn Linux and C programming then you might want to learn python. Also any cross platform language is good. There is no harm in learning C# also. But use V
