All of these expensive media are easy to scratch and fingerprints are often the last thing you want. Extensions Software Description: Ez-Supreme is a Windows system utility to clean empty memory. Although you can use Task Manager to do that, it is not particularly easy to find out where the memory is allocated. Ez-Supreme offers the solution, by showing you all the memory currently in use by running processes, and by displaying the memory allocated, in bytes, to each process. Ez-Supreme is a freeware application, it does not contain any functionality to restore the memory lost. Ez-Supreme Description: Ez-Supreme is a Windows system utility to clean empty memory. He replied on December 6th 2005: (from George) A new user was not created. What email address did you wish to use? You can create a new user manually, but it will require that you know both an email address and a password, and it's likely to be easier to use your existing account. Here is the problem I never got the requested Email address from you. I received the message from you, but as you mentioned, it could not be read, due to unknown errors that have occurred in sending the email. I replied via the method you suggested, but I had no Response from the server. I checked your email address and it seemed correct. I hope you still want to be a user of FileFX. This may be the problem. You can contact the host to see if they can help you out. Thanks, George There's an option in the Settings panel that lets you disable the printing of download speed 2005-12-22 21:24:28 User: Anonymous Review by Anonymous This is an excellent app, well worth the fee I paid for it. It is worth much much more. It is of course critical that all spaces in a filename are removed, and that you don't have a filenames with spaces in it. What is also brilliant is that it will remove the spaces that are within a file that has a space in it, but outside of the filenames. You could use this to remove spaces that occur between the titles of MP3's, and other files in that sort of situation. For example, say you have a clip of "The Mummy" on your computer. Within that clip, is a clip of "The Mummy for the Nth time." The first clip is the main clip, the other is just a side clip. If you save those two clips as The Mummy, you could have a space between them. I like that it works with video files, and it also works with images. While I have not found it to
