Q: how to display profile picture of logged user in wp7? i am trying to display the logged user's profile picture in the main page of my application using the following code: i'm getting the following error: The type 'Image' was not found. Verify that you are not missing an assembly reference and that all referenced assemblies have been built. what is wrong here? A: The image resource is in a project that is not a part of the Default project for this WP7 app, and therefore not packaged inside a bin\img folder with the WP7 app. This is one of the very few WP7 scenarios where a separate build process is not needed (other than the images you create of course). You have a few options, but I suggest making a new WP7 app from a Blank template and copying

over the images (that is the smartest and cleanest way). Otherwise, you can try to get the bin\img folder into your source and do a content\appxref\img*.png. This is the same if you compile WP7 apps from other or other platforms. Q: Get the value of hidden input tag I am having a search result page and in that i have a hidden input as After that i load a new jsp page and using that hidden value i am displaying the data in that page. But this time the value of the hidden input is (empId=[ID];jobTitle=[Title];department=[Department]) the value of empId should be unique only but i am getting multiple values. How to get the value of the empId? Can i know the use of #{item.empId}? The hidden value is A: That's because you're not

Kathleen Sebelius stepping down as HHS Secretary, Tom Perez selected to replace her

FARMINGDALE, New York (CNN) -- Kathleen Sebelius' first term as health and human services secretary was marked by political infighting over the Obama administration's healthcare law, decision making that often placed her at odds with other administration officials, a CNN/ORC International poll out Tuesday finds. Sebelius was selected Tuesday to serve out the rest of the Obama administration, despite a split within the Democratic Party over the controversial law. Sebelius announced her resignation in October and accepted President Barack Obama's nomination to continue serving as secretary of the U.S. Department of Health and Human Services (HHS). "Serving this nation in the position of Secretary of Health and Human Services is the greatest

honor of my life," Sebelius said in a statement. "For all of the times people have criticized me, the fact is I was never more proud of a job well done, and the strides we have made as a nation." Sebelius says she will return to Kansas and take up residence in her hometown of Wichita. "I thank President Obama and the administration for this extraordinary opportunity, and I am proud of the progress we have made in securing health coverage for millions of Americans and helping countless others live healthier lives," she said. Sebelius served as Kansas' first female governor. "Outgoing Governor Sebelius is a pioneer in health care reform, having been at the forefront of the struggle to bring health care coverage to the citizens of Kansas," Obama said in a statement Tuesday. Sebelius was a controversial figure in the Obama administration. While many Republicans

criticized her over the rollout of the federal law, many Democrats praised her efforts to expand health insurance coverage. President Obama, who put Sebelius' nomination forward, expressed his respect for her work. "Kathleen Sebelius has been a leader in everything she's done in public service, whether she's been mayor of Wichita or governor of Kansas," Obama said. "She's been a tireless advocate for her state, and she's done outstanding work for the American people. Kathleen's vision for improving the way we care for the elderly has advanced the cause of Medicare, and she's taken bold steps to promote health insurance in this country. I've got tremendous respect for her -- even when she disagrees with me
