1. Field of the Invention

The present invention relates to semiconductor memory devices, and more particularly to a semiconductor memory device including a DRAM (Dynamic Random Access Memory) and a high speed SRAM (Static Random Access Memory) on the same semiconductor chip.

2. Description of the Background Art

In recent years, an amount of information to be handled in computers,

telecommunication devices, and the like has been increasing. A semiconductor memory device that stores a great amount of information is required to operate at a high speed.

In a DRAM, a bit line is typically pre-charged in a standby mode, data is read/written, a refresh operation is performed, and a bit line pre-charge is performed. The refresh operation is used to prevent data stored in a memory cell from disappearing

Abdio Free MOV Player Incl Product Key

Abdio Free MOV Player is a simple, yet highly efficient MOV player. The program not only plays all types of MOV files but also supports a lot of other formats as well. It doesn't just have a reader for MOV files, but it also has a conversion tool, allowing you to convert MOV files to other supported formats. It is highly recommended that you do not place any files into the folder

C:\Windows\Temp as this folder automatically gets emptied whenever you close the application. This lightweight player supports many files including AVI, MPEG, WMV, MOV, MP4, 3GP, FLV, and many more. Besides the MP4 format, the MOV file also supports a large number of other formats. The downloaded files need not be converted before they can be opened. This player supports the following types of files: AVI, MPEG, WMV, MOV, MP4, 3GP, FLV, and many more. There is no conversion of files that are not supported by the player. Besides having a built-in player for MOV files, Abdio Free MOV Player also has a converter that allows you to convert MOV files to other formats like MP4, AVI, etc. The player does not require you to install it and can be

launched directly from your browser. No setup or installation is required. The player can be started on demand. You can easily pause/restart, forward and rewind the media clips and bookmark them for later. The player is highly reliable as the media files are not stored in the temp folder.
