In a land long lost to history, the two gods of light and dark fought a battle that left the ancient city called Vales of Aggon hidden in the mountains. But many years later, the gods' daughters have returned seeking vengeance on their mothers. The two gods' sacrifices to their children's fathers have created an eternal battlefield spanning across four dimensions. At the epicenter of this battleground, the ancient city of Vales of Aggon, lies the Fallen City: a city hidden in the mountains, where the gods' daughters fought, but where death has yet to conquer. Full Length Trailer: For our Kickstarter launch, we've published a full length trailer. This trailer is more of a proof of concept, more footage from the final game. the music for this game was a major task and we'd like to thank the talented Massive Black-Cat team for the work they put into it. Their background work on the game is one of our key features, we think, as we've been working together for over a year. Our soundtrack features a wide variety of music. Listen to the track list below to see if it suits your gameplay style. About the Kickstarter: The goal of our Kickstarter Campaign is to gather the funds necessary to finish the game, with the help of fans. Our campaign is primarily a donation campaign, but if you want to be one of our first backers, we also give special rewards for early birds and backers.Our Estimated Delivery: The estimated delivery is over 3 months. This will be updated after we gather funds but we're hopeful to reduce this. Our Current Backers: After 5 days of launch, our audience is growing. We've received funds from more than 30 countries. With the help of our supporters, we will keep on working to get this game out and keep your support on the table for future projects! Kickstarter Campaign: Website: Facebook:

Hotel Tutwin is a visual novel designed for horror / romance lovers, but can also be quirky and cute. Each story line is quick and to-the-point, but there are many to discover. Prepare for inevitable deaths. You play as Penni, who is compelled to enter a mysterious hotel with her childhood friend. From outside, Hotel Tutwin seems abandoned and empty, but wait. It's up and running? The characters you will meet are a strange bunch, but don't let them fool you. The world at Hotel Tutwin is a balanced ecosystem that has yet to be disrupted. Penni can choose between three male love interests, all of which have stories hidden in branches other than their main one. This means you can't learn everything about one character by only

playing the path leading to their happy ending. And it's not like the story is made of happy endings either. In fact, only about one third of the endings are good. So if you're looking for an easy love story without death or hardship, don't look here! Hotel Tutwin will keep you guessing until the end. There are lots of choices that will result in differing experiences, and you can visit different characters with your own heart if you pay attention to the hints! What happened in this hotel? Who put them here? Some stories are only found by the player, like the one regarding the strange former art teacher and the head of the hotel. And other stories might be part of the story involving the murderer, which might surprise you at the end, depending on your decision... Star Control III [Win/Mac] [Updated]

"Pathologic Classic HD" Gameplay is almost perfect 10/10. IMO its the best gameplay ever made. Everything is perfect. The game design is really intelligent and innovative, all unique. You cant find anything like it. The goals are simple, to kill the people and/or save the people. This game does it very very well. The gore and violence is real. You are never bored. The people you kill are really REALLY worth it. You feel what these people went through. You experience their pain. I know, if this is the first game that you've ever played, then you might be very confused, thinking "This is going nowhere!". But this game is very complex, challenging, and full of plots and twists. Its really a mystery everytime you play. You really have to find out what happened to you. Its a very good game, a very unique game. I know that after all of my great ramblings, you might be thinking "And this game is simply horrible, just an ordinary game". But thats completely wrong. What is really horrible is the lack of critical reviews. So many games are just hyped up by a few "crowds", and leave users confused and dissatisfied. Sadly, this one is a great game, which gets awful reviews because

people dont try it out. This game deserves an A+, and it deserves a good review. "Pathologic Classic HD" Gameplay is almost perfect 10/10. "Pathologic Classic HD" Gameplay is almost perfect 10/10. What's new:

book/ : Gonna do some "little" crazy metalwork because I seem to like it a lot and it's all I can do at the moment. Not sure how constructive it'll be for the "reality" of the times but... XD SO... I think that's pretty much it for this update... too sleepy now to finish this post so I shall await for more in the day! Anyways. Strange sessions the past couple of days for me. But I seem to be getting better.
