The new in-game rendering uses physics to reproduce the behavior of players as if they were in real-life, thanks to the capture of their movements. The famous 3D face and head tools from PES will now be able to map facial features and facial expressions, to ensure that no player faces appear to be abnormally distorted in-game. Details for Fifa 22 Cracked 2022 Latest Version are as follows:

- New Player Cloning Technology. Create your own player avatar and play as their likeness. For the first time, you can use all new player body shapes, define every inch of their body, manipulate their teeth, face, eyes and skin. Control how they move and feel. Experience the emotional intensity of these players as you create the perfect replica of your favorite player.
- "GameFace," a new head and facial expressions technology to track facial expressions in real-time. Players will be able to see reactions on their opponent's faces and react as they perform actions.
- "Isocontour" technology for the best in-game definition of athletes and human body. This allows the engine to display improved visual definitions of players and limbs for a more realistic football experience.
- New control of defensive behavior as a result of new Player and Coach Behavior systems. Players will be able to adapt and react to each other in real-time, sending players through their environment through pass-blocking, tackling, and aerial attacks.
- New Player Elastography technology. Elastography is a new vital sign feature that was recently introduced in various PE video games. From now on, you can collect and monitor the elastography data of real players and use this data to enhance the health of your player in-game.
- New 3D stereo Camera design. This is a revamped 3D stereo camera system that enables you to see a 360-degree and rich image from all angles and places in the pitch. Stereoscopic camera data can be used to provide realistic visual feedback for a more comfortable football experience.
- New Simulation Overall System: This new dynamic Simulation Overall System will take in players' mental state and their performance on the pitch and help players to make decisions during the game. This includes things like player-to-player communication and teammate roles.
- Improved AI System: AI System aims to improve players' performance in the game through player evaluation and planning.
- New Adrenaline Rush gameplay experience.
