The White House made a ruling that local city administrations cannot ignore federal law, so such discussions are on the table. But is the time ripe to end welfare benefits for illegal immigrants? Here's the background. Immigrants are subject to in-person and in-person interviews to determine whether they qualify for benefits. If an illegal immigrant is found eligible, the district attorney's office will pay the benefits. So far, just under 150 children have applied for benefits. Advocates say that while fewer than 100 are eligible, the publicity around the cases could encourage more children to apply. "I think the fact that we have so many children going around saying, 'Look, I was born in this country' has caused a lot of us to question our eligibility," says Christina Parreira, the mother of the children who have applied for benefits. It is not only the most magical of books, but also a literary masterpiece and a philosophical work of rare depth and beauty. "It is a grand, vast work, composed on the model of the Divine Comedy, and there is no more beautiful book which has been made for the past ten years. I can think of nothing comparable in its way, and if a man were to call the Invisible Cities by the name of the most famous book in the world, he would be speaking the truth, for the Invisible Cities, at least, belongs to that very distinguished company..." —Pico della Mirandola, sixteenth century Italian writer and mathematician "The first sentence tells you everything: Forasmuch as we have heard of a certain figure of Egypt, that he made cities invisible, and then as this city was so built, that there might no more be any cause for doubt that he could not make them visible again, we have determined not to content ourselves with any less degree of diligence, but also to make the cities that are in our own country invisible." —Domingo Báñez, fourteenth-century Spanish historian and mathematician "Invisibility was a concept of great importance for Pico; for, much as his Platonic vision of the cosmos depended on the existence of an Invisible World, it was precisely that unique world of mathematics that was necessary for and embraced by the making and conceiving of a new universe." —Edwin Truscott
