Thunderbird and Mozilla Firefox *_T RIBURT_* is the most widely used e-mail client with over 70 million active users worldwide. It is developed by a non-profit organization called the **Thunderbird Foundation**. Like all e-mail programs,

Thunderbird must store your e-mails in a folder called Trash. You can also create other folders to store special types of messages (for example, those containing attachments). As with e-mail programs, there are many ways to organize and access your e-mails. For example, you can use the Entourage and Fastmail systems. Entourage is the name of the e-mail software bundled with the Microsoft Windows operating system, which was later renamed Windows Live Mail. Fastmail is an independent e-mail provider that is based in Victoria, Canada, and comes bundled with both Firefox and Thunderbird. The following sections provide a brief overview of Thunderbird and the Fastmail.com e-mail service. Fastmail is not necessary for beginners who are just learning how to manage their e-mail.
