Zap Dem Rats is a Third Person Shooter game that is intended for all ages. In the tutorial, Mr. Prez explains the function of the red and blue ray guns while he travels across the city, talks to actors, and watches radio news broadcasts. There is no blood or guts or violence, as Mr. Prez walks a lot (the city is large), and the only action is zapping signs or zombies. Zombie voters are not violent and are not shot. Mr. Prez keeps his own safe intact. Zombie signs are dropped when he zaps them, and get picked up in Tommy's Garage. So the player can save and replay scenes without losing progress. The game has the feel of a comedy, with plenty of funny scenes and witty dialogue. Mr. Prez uses a cane or is assisted by Tommy's aidbots in shooting his enemies, and at the end of the last scene, he brings Tommy to the Whitehouse as his hot guardian angel. Mr. Prez can help himself by pacing his ammo wisely (14,000 red ray bursts, and 8,000 blue ray bursts). The dark red levels of hell have less resources so can be zapped for a brief delay. Mr. Prez is in a basement lair with his home in a car in Tommy's Garage at the end of the final scene. He needs a magic force field to hold off the hornets. How many lives does Mr. Prez have? One or two. How is it resolved? A high score wins. What is new? The main game is the tutorial scene. The tutorial starts as Mr. Prez drops into the basement lair with his home in a car. There is a tutorial icon () on the screen, and a turn arrow on the right side. Mr. Prez explains the function of the ray guns and how to leave the lair safely. He also mentions the important issue of the media slandering Mr. Prez and he speaks about how we need to fix the corrupt system. He describes his training at the juvenile home and his life with Amy and Amy and the White House Kids. The second game is the above tutorial scene with its second tutorial, which is the same scene but with the turtle of Tommy's Garage replaced with the Whitehouse. The third game is our player design scene where Mr. Prez is in

KEY GAME OVERVIEW

The story begins when the fiancée of an alien race raises her daughter, Meishin. The daughter suddenly loses the first memories of her life, and realizes she doesn't remember her only parent, her mother. The guardians of the family try to use all their powers to clear the darkness, but they cannot find any way to bring Meishin's true mother back. What they learn, adds new depth to the already twisted tale. It is here that Meishin begins to seek Goddesses, mystics who know the power of the Divine Mother Wisdom and the secrets of falling in love and of missing.

Released on March 28, 2015. INTRODUCTION: Sci-Fi themed maps focus on the role playing and miniatures genres of fantasy gaming. The usual fantasy modules often depict lush landscapes with brilliant sunrises and evenings, but sci-fi modules set a mood of paranoia and tension, brutal action and grimy alien encounters. Sci-fi-themed modules feature all kinds of uncomfortable adventures in unearthly places and time frames. This is a great update of the existing sci-fi maps, containing 25 battlemaps, ship interiors and one canyon map. VARIETY OF MAPS: Sci-fi themed maps feature all kinds of places. In ship interiors for example, you can find dilapidated ships in the tight corridors, the nooks and crannies of worn out or space-hardened vessels. Space stations and canyons represent the most alien places imaginable. Looking for a challenging canyon adventure? The sci-fi map "Escape" will do the trick. This map is full of caves, narrow corridors and underground bunkers and are, therefore, optimized for transportation in Fantasy Grounds. The module also includes three battle maps of various sizes. Battle maps are the most detailed maps. The terrain and the objective are clear. The circle of enemies is indicated by a blue dot and the position of your units is marked by a red dot. If you want to experience the adventure like a real sci-fi shooter, you should try out the "Battle for the Emyrean" map. INCLUDED MAPS: Concept Sketches: Map Compilation: Within this pack you can find the following maps: Battle for the Emyrean: A small map in which you have to protect your weak Pilots from enemies. Your game will turn into a chaotic dogfight after the abduction of your Pilots in the PX1 Fighter in the enemy's base. Escape: In this map, the objective is to escape from the enemy base. Landing pad: A small map in which you land on an unknown planet from an unknown ship. Smelter: On this map, the enemy has established a Smelting base on a nearby planet, where they try to gain points on their way back to their own planet. Ship interior: Pilots, Crew
