In 1985, Alias|Wavefront was acquired by Autodesk, and from then on, development of AutoCAD was mostly led by Autodesk. AutoCAD 2.0 was released in 1986. The next year, the name of the program was changed to AutoCAD. In 1989, it was released on the Apple Macintosh platform. AutoCAD for Windows was released in 1992, and AutoCAD for Macintosh was released in 1993. The Macintosh version uses a menu-driven interface (similar to the DOS versions), whereas the Windows and Windows-OS/2 versions use a command-line window. AutoCAD for Windows was made available for Windows 3.1, Windows 95, Windows 98, Windows 98 SE and Windows ME. AutoCAD for Windows was also available for Windows 3.11 until it was withdrawn from sale
