Wb9181a Abm 1 75lkjh - tablet.19 kb.net.Intrathecal morphine for management of cancer pain: A randomized prospective trial comparing morphine 1 g with 3 mg for the first 12 hours. Intrathecal morphine (ITM) may be considered for the management of moderate to severe cancer pain, but no consensus exists regarding the dose and infusion duration of morphine in the ITM program. We conducted a randomized, open-label, prospective, single-center trial to compare single-dose ITM using 1 g with ITM using 3 mg of morphine. The primary objective was to evaluate the safety and efficacy of ITM given over 12 hours. Secondary objectives were to evaluate pain intensity (on a 100-mm Visual Analog Scale [VAS]), functional status (using the Eastern Cooperative Oncology Group [ECOG] scale), sedation/sedation-related adverse events, and side effects. We enrolled 61 patients, 29 in the 1 g group and 32 in the 3 mg group 6d1f23a050
