Filed in: Our crack tools are compatible with all versions of Windows operating systems. We offer a discount for professional users. For more detailed information about the package and prices, contact our Sales department.

Q: Single quotes and apostrophes - are they interchangeable? When I use single quotes or apostrophes, is it normal for me to replace them with double quotes if I mean single quotes? A: In general if you use single quote in a string literal you must use double quotes when you need single quote to indicate the end of the string literal. For example: "name is 'Ross' 'andrea'" will lead to the compilation error: java: error: ';' expected while "name is 'Ross' 'andrea'" will compile fine. Usually there is no need to do this. One of the most common use case is when you want to add an escape character in your string. For example, public static void main(String[] args) { String name = "Anna"; String message = "Hello, " + name + "'s message."; } In this case, using single quotes for string literal is OK, as you can see, we don't want to escape the apostrophe in single quote but using double quotes will lead to the compilation error. String[] values = {"Anna", "luca", "Antonio"}; String message = "Hello, "" + String.join("", values) + ""'s message."; System.out.println(message); will print Hello, "Anna"s message." Q: Integration using Fubini's Theorem I am attempting to evaluate the following integral:
$$\int_0^{\infty} \int_0^{\infty} \int_0^{\infty} \frac{1}{(x+y)^2} \frac{1}{x} \frac{1}{y} \frac{1}{z} dx dy dz$$
 I know, intuitively, to split the integral into a product of 3 integrals in the order xyz , but I'm not sure how to formalise this... (Answered my own question for future reference here: 6d1f23a050
