The official trailer for Christopher Nolan's Interstellar starring Matthew McConaughey. . So in the film, Nolan decided not to repeat the plot of the book, but to use other ideas. The film is based on the novel. The film tells about travels on Earth, but more about other worlds and dimensions. What really strikes me is the special effects. They are top notch! There was something similar in Armageddon, but here everything is an order of magnitude higher! The main characters in the film are former colleagues, and now friends. They live in different worlds and have different views on life. This is very interesting and unusual.
