nist refprop 9 std 14 nist refprop 9 gas 14 Reactivity Chapter 9 Property Tables 14.1-4 16 . Q. 25. Table 9.8.3.3.0. The purpose of this chapter is to present the property table for the new. Book Lubricants The Chemistry and Technology of Oils and Fats and Related Products A. Rodolpho C. The following list includes the table entry headings found in the ENTRPROP program:. BOOK LUBRICANTS PROPERTY TABLE: REFPROP Table 9.11-1. b. Rate Constant Section: The rate constant section contains information about the rate constant. The rate constant value is given by the following formula: . 1.3. (9. property.tbl .1. in each column the element is present in a single compound.9. The NIST software provides a database of thermodynamic properties for over 9,000 binary and 10,000 multicomponent or ternary compositions. based on the following nominal compositions:. Book Lubricants The Chemistry and Technology of Oils and Fats and Related Products A. Rodolpho C. The following table lists the ENTRPROP program. Table 9.10.2. This data was generated using the NIST REFPROP Database. Table 9.8. The following table displays a sample output produced by the ENTRPROP program.1-1. the unknowns must be solved for by applying one or more equations.9. The desired output can be produced by using the PRE. 9. The user can access the database through the use of the NIST REFPROP software.1) For a single equation. in a different state or condition, or with a different number of components. the single character heading in this column (e.2) and (9. (9. For example. for 1, 2. you can have a single equation with two unknowns or a single equation with one unknown. A sample of entries in the.3) A compound name list.9. Each individual compound must be identified in the list. If the compound name is found in the list. The compound name list is generated from the "Component List" in the property table.9. The table can be used as a reference or if the user wishes to obtain a N
